

RougeCoin & Operator Network Roadmap (2025)

Including Rougee.io - Decentralized Operator Social Network

Q2 2025 - Foundation Lock-In

- XRGE Ethereum relaunch and contract security audit
- XRGE Base Chain deployment via LayerZero bridge
- Anti-drain liquidity system deployment (Base & ETH)
- Operator-style Telegram Bots live: RougeCommander & Glitch (Base chain tracking)
- Core Rougee.io platform stabilization:
 - - User accounts, profiles, and posting
 - - Operator-only private channels
 - - Secure login flow and anti-bot measures

Q3 2025 - Expansion & Operator Network

- Dexscreener API integration for live price tracking
- Operator alerts: stealth liquidity monitor, price spikes, bot detection
- Rougee.io Social Expansion:
 - - Operator mission logs and stealth drops
 - - Enhanced user profiles, badges, and role access
 - - Media uploads and sharing (photos, videos)
- Begin Rougee Music development:
 - - music.rougee.io live
 - - Custom user profiles and artist system (independent DB)
 - - Audius API streaming integration
- XRGE Operator command center (Website control panel)

Q4 2025 - Ecosystem Growth

- Native uploads (IPFS / Cloudflare R2) for music platform
- Operator-only stealth missions (NFT holders / role access)
- Full token analytics on rougecoin.xyz
- Glitch and Commander AI mini-games in Telegram
- Operator Easter eggs unlock across platforms

- Rougee.io Social Scaling:
- - Operator referral system
- - Community ranking algorithms
- - Decentralized content moderation tests

Q1 2026 - Full Operator Autonomy

- Launch Operator gear / merch drop
- Test operator mobile app (Rougee.io operator edition)
- Operator network protocol beta (Rougee Protocol V1)
- Full self-hosted music platform alpha (Rougee Music alpha, independent from Audius)
- Rougee.io decentralized social features:
 - - Private decentralized groups
 - - On-chain content verification
 - - Operator-to-operator encrypted messaging

All dates and missions are fluid. Operators adjust strategies in real-time depending on mission status and tactical intel.
